

## Neo4j Status Codes v4.1

## © 2020 Neo4j, Inc.

Documentation license: Creative Commons 4.0

This document lists the Neo4j status codes for Neo4j version 4.1.

Each status code follows the same format: Neo. [Classification]. [Category]. [Title]. The fact that a status code is returned by the server does always mean there is a fatal error. Status codes can also indicate transient problems that may go away if you retry the request.

What the effect of the status code is can be determined by its classification.

## 1. Classifications

Classification	Description	Effect on transaction
ClientError	The Client sent a bad request - changing the request might yield a successful outcome.	Rollback
ClientNotification	There are notifications about the request sent by the client.	None
TransientError	The database cannot service the request right now, retrying later might yield a successful outcome.	Rollback
DatabaseError	The database failed to service the request.	Rollback

## 2. Status codes

This is a complete list of all status codes Neo4j may return, and what they mean.

Status Code	Description
Neo.ClientError.Cluster.NotALeader	The request cannot be processed by this server. Write requests can only be processed by the leader.
Neo.ClientError.Database.DatabaseNotFound	The request referred to a database that does not exist.
Neo.ClientError.Database.ExistingDatabaseFound	The request referred to a database that already exists.
Neo.ClientError.Fabric.AccessMode	The request could not be completed due to access mode violation
Neo.ClientError.General.ForbiddenOnReadOnlyDatabase	This is a read only database, writing or modifying the database is not allowed.
Neo.ClientError.General.InvalidArguments	The request contained fields that were empty or are not allowed.
Neo.ClientError.General.TransactionOutOfMemoryError	The transaction used more memory than was allowed. The maximum allowed size for a transaction can be configured with 'dbms.memory.transaction.max_size' in the neo4j configuration (normally in 'conf/neo4j.conf' or, if you are using Neo4j Desktop, found through the user interface).
Neo.ClientError.Procedure.ProcedureCallFailed	Failed to invoke a procedure. See the detailed error description for exact cause.
Neo.ClientError.Procedure.ProcedureNotFound	A request referred to a procedure that is not registered with this database instance. If you are deploying custom procedures in a cluster setup, ensure all instances in the cluster have the procedure jar file deployed.
${\tt Neo.ClientError.Procedure.ProcedureRegistrationFailed}$	The database failed to register a procedure, refer to the associated error message for details.
Neo.ClientError.Procedure.ProcedureTimedOut	The procedure has not completed within the specified timeout. You may want to retry with a longer timeout.

Neo. ClientError. Request Invalid  The Client provided an invalid request.  Neo. ClientError. Request Invalid The Client provided an invalid request.  Neo. ClientError. Request Invalid Format The Client provided a request that was missing required fields, or had values that are not allowed.  Neo. ClientError. Schema. ConstraintAlreadyExists Unable to perform operation because it would clash with a pre-existing constraint.  Neo. ClientError. Schema. ConstraintValidationFailed Aconstraint that does not exist.  Neo. ClientError. Schema. ConstraintValidationFailed Aconstraint imposed by the database was violated.  Neo. ClientError. Schema. ConstraintValidationFailed Aconstraint imposed by the database was violated.  Neo. ClientError. Schema. ConstraintVilolation Added or changed index entry would violate constraint that does not exist.  Neo. ClientError. Schema. ConstraintVilolation Added or changed index entry would violate constraint to Unable to perform operation because constraint with given name already exists.  Neo. ClientError. Schema. ForbiddenOnConstraintIndex Schema. ForbiddenOnConstraintIndex Schema. IndexNet/readyExists IndexNet/readyExists IndexNet/readyExists IndexNet/readyExists IndexNet/readyExists IndexNet/readyExists IndexNet/readyExists Unable to perform operation because an equivalent schema. IndexNet/readyExists Unable to perform operation because it would clash with a pre-existing index.  Neo. ClientError. Schema. IndexNet/readyExists Unable to perform operation because it would clash with a pre-existing index.  Neo. ClientError. Schema. IndexNet/pelicable Index IndexNet/readyExists Unable to perform operation because it would clash with a pre-existing index.  Neo. ClientError. Schema. IndexNet/tehander IndexNet/readyExists Unable to perform operation because index with given name already exists.  Neo. ClientError. Schema. IndexNet/tehander IndexNet/tehander IndexNet/tehander IndexNet/tehander IndexNet/tehander IndexNet/tehander IndexNet/tehander IndexNet/tehander IndexNet/tehander IndexNet/te	Status Code	Description
Neo. ClientError. Request. Invalidionat The client provided a request that was missing required fields, or had values that are not allowed.  Neo. ClientError. Request. Invalidionate The Client made a request but did not consume outgoing buffers in a timely fashion.  Neo. ClientError. Schema. ConstraintAlreadyExists Duable to perform operation because it would clash with a pre-existing constraint.  Neo. ClientError. Schema. ConstraintNotFound The request (directly or indirectly) referred to a constraint that does not exist.  Neo. ClientError. Schema. ConstraintViolation Added or changed index entry would violate constraint with given name already exists.  Neo. ClientError. Schema. ConstraintNithNameAlreadyExists given name already exists.  Neo. ClientError. Schema. EorbiddenOnConstraintIndex Schema. Constraint with given name already exists.  Neo. ClientError. Schema. ForbiddenOnConstraintIndex Schema. ForbiddenOn	Neo.ClientError.Procedure.TypeError	A procedure is using or receiving a value of an invalid type.
fields, or had values that are not allowed.   The client made a request but did not consume outgoing buffers in a timely fashion.	Neo.ClientError.Request.Invalid	The client provided an invalid request.
buffers in a timely fashion.  Neo. ClientError. Schema. ConstraintAlreadyExists  Pre-existing constraint.  Neo. ClientError. Schema. ConstraintValidationFailed  A constraint imposed by the database was violated.  Neo. ClientError. Schema. ConstraintValidationFailed  A constraint imposed by the database was violated.  Neo. ClientError. Schema. ConstraintValidationFailed  A constraint imposed by the database was violated.  Added or changed index entry would violate constraint with given name already exists.  Neo. ClientError. Schema. ConstraintViolation  Neo. ClientError. Schema. EquivalentSchemaRuleAlreadyExists  Unable to perform operation because constraint with given name already exists.  Neo. ClientError. Schema. ForbiddenOnConstraintIndex  A requested operation can not be performed on the specified index because the index is part of a constraint. If you want to repet the index, for instance, you must drop the constraint.  Neo. ClientError. Schema. IndexAlreadyExists  Pusable to perform operation because it would clash with a pre-existing index.  Neo. ClientError. Schema. IndexNotApplicable  The request did not contain the properties required by the index.  Neo. ClientError. Schema. IndexNotApplicable  The request (directly or indirectly) referred to an index that does not exist.  Neo. ClientError. Schema. IndexNotApplicable  The request did not contain the properties required by the index.  Neo. ClientError. Schema. IndexNotApplicable  The request did not contain the properties required by the index.  Neo. ClientError. Schema. RepeatedPropertyInCompositeSche  Unable to create index or constraint because schema had a repeated label.  Neo. ClientError. Schema. RepeatedPropertyInCompositeSche  Unable to create index or constraint because schema had a repeated property.  Neo. ClientError. Schema. RepeatedRelationshipTypeInSchema  A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo. ClientError. Security. AuthorizationExpire	Neo.ClientError.Request.InvalidFormat	
pre-existing constraint.  Neo.ClientError.Schema.ConstraintNotFound The request (directly or indirectly) referred to a constraint that does not exist.  Neo.ClientError.Schema.ConstraintValidationFailed A constraint imposed by the database was violated.  Neo.ClientError.Schema.ConstraintWithNameAlreadyExists given name already exists.  Neo.ClientError.Schema.ConstraintWithNameAlreadyExists given name already exists.  Neo.ClientError.Schema.EquivalentSchemaRuleAlreadyExists schema rule already exists.  Neo.ClientError.Schema.ForbiddenOnConstraintIndex A requested operation because an equivalent schema rule already exists.  Neo.ClientError.Schema.ForbiddenOnConstraintIndex A requested operation because an equivalent schema rule already exists.  Neo.ClientError.Schema.IndexAlreadyExists Unable to perform operation because it would clash with a pre-existing index.  Neo.ClientError.Schema.IndexAlreadyExists Unable to perform operation because it would clash with a pre-existing index.  Neo.ClientError.Schema.IndexNotApplicable The request referenced an index by its schema, and multiple matching indexes were found.  Neo.ClientError.Schema.IndexNotFound The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.RepeatedLabelInSchema Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche Bana Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche Bana Unable to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.TokenNameError A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit The cilent has provided incorrect authentication details to omany times in a row.  Neo.ClientError.Security.CredentialsExpired The stored authorization info has expired. Please reconnect	Neo.ClientError.Request.InvalidUsage	The client made a request but did not consume outgoing buffers in a timely fashion.
that does not exist.  Neo.ClientError.Schema.ConstraintYalidationFailed A constraint imposed by the database was violated.  Neo.ClientError.Schema.ConstraintYiolation Added or changed index entry would violate constraint Neo.ClientError.Schema.ConstraintWithNameAlreadyExists Unable to perform operation because constraint with given name already exists.  Neo.ClientError.Schema.ForbiddenOnConstraintIndex Schema rule already exists.  A requested operation can not be performed on the specified index because the index is part of a constraint. If you want to drop the index, for instance, you must drop the constraint.  Neo.ClientError.Schema.IndexAlreadyExists Unable to perform operation because it would clash with a pre-existing index.  Neo.ClientError.Schema.IndexMultipleFound The request referenced an index by its schema, and multiple matching indexes were found.  Neo.ClientError.Schema.IndexNotFound The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexNotFound The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.RepeatedLabelInSchema Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit The cient name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationExpired The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.Unauthorized The request could not be completed due to authentication failure.  The statement is attempting to perform operations using invalid arguments	${\tt Neo.ClientError.Schema.ConstraintAlreadyExists}$	
Neo.ClientError.Schema.ConstraintViolation Neo.ClientError.Schema.ConstraintWithNameAlreadyExists Neo.ClientError.Schema.EquivalentSchemaRuleAlreadyExists Neo.ClientError.Schema.ForbiddenOnConstraintIndex Neo.ClientError.Schema.ForbiddenOnConstraintIndex Neo.ClientError.Schema.ForbiddenOnConstraintIndex Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexNotApplicable The request referenced an index by its schema, and multiple matching indexes were found. Neo.ClientError.Schema.IndexNotApplicable The request did not contain the properties required by the index. Neo.ClientError.Schema.IndexNotFound The request (directly or indirectly) referred to an index that does not exist. Neo.ClientError.Schema.RepeatedLabelInSchema The request (directly or indirectly) referred to an index that does not exist. Neo.ClientError.Schema.RepeatedLabelInSchema Unable to perform operation because index with given name already exists. Unable to create index or constraint because schema had a repeated label. Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated property. Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated property. Neo.ClientError.Schema.TokenNameError Neo.ClientError.Schema.TokenNameError The stored authorization info has expired. Please reconnect. Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect. Neo.ClientError.Security.Houthorized The client is unauthorized and need to be updated. Neo.ClientError.Statement.AccessMode The request could not be completed due to access mode violation The client is unauthorized due to authentication failure. The client is unauthorized due to authentication failure. The request could not be completed due to access mode violation	Neo.ClientError.Schema.ConstraintNotFound	
Neo.ClientError.Schema.ConstraintWithNameAlreadyExists Neo.ClientError.Schema.EquivalentSchemaRuleAlreadyExis Neo.ClientError.Schema.ForbiddenOnConstraintIndex Neo.ClientError.Schema.ForbiddenOnConstraintIndex Neo.ClientError.Schema.ForbiddenOnConstraintIndex Neo.ClientError.Schema.ForbiddenOnConstraintIndex Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexAlreadyExists Neo.ClientError.Schema.IndexMultipleFound The request referenced an index by its schema, and multiple matching indexes were found. Neo.ClientError.Schema.IndexNotApplicable The request did not contain the properties required by the index. Neo.ClientError.Schema.IndexNotFound The request (directly or indirectly) referred to an index that does not exist. Neo.ClientError.Schema.RepeatedLabelInSchema The request (directly or indirectly) referred to an index that does not exist. Neo.ClientError.Schema.RepeatedLabelInSchema Unable to perform operation because index with given name already exists. Unable to create index or constraint because schema had a repeated label. Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated property. Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated property. Neo.ClientError.Schema.TokenNameError Atoken name, such as a label, relationship type or property key, used in not valid. Tokens cannot be empty strings and cannot be null. Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect. Neo.ClientError.Security.Forbidden An attempt was made to perform an unauthorized action. Neo.ClientError.Statement.AccessMode The request could not be completed due to access mode violation Neo.ClientError.Statement.AccessMode The request could not be completed due to access mode violation	Neo.ClientError.Schema.ConstraintValidationFailed	A constraint imposed by the database was violated.
given name already exists.  Neo.ClientError.Schema.EquivalentSchemaRuleAlreadyExis schema rule already exists.  Neo.ClientError.Schema.ForbiddenOnConstraintIndex specified index because the index is part of a constraint. Syou want to drop the index, for instance, you must drop the constraint. On the constraint of constraint of constraint. Syou want to drop the index, for instance, you must drop the constraint. Syou want to drop the index, for instance, you must drop the constraint. Syou want to drop the index, for instance, you must drop the constraint. Syou want to drop the index, for instance, you must drop the constraint. Syou want to drop the index, for instance, you must drop the constraint. Syou want to drop the index, for instance, you must drop the constraint because it would clash with a pre-existing index.  Neo.ClientError.Schema.IndexMultipleFound The request did not contain the properties required by the index.  Neo.ClientError.Schema.IndexMotApplicable The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexMithNameAlreadyExists Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedLabelInSchema Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem a repeated relationship type.  Neo.ClientError.Schema.TokenNameError Atoken name, such as a label, relationship type or property key, used is not valid.Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.Unauthorized The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode The client is attempting to perform operations using invalid arguments.	Neo.ClientError.Schema.ConstraintViolation	Added or changed index entry would violate constraint
schema rule already exists.  Neo.ClientError.Schema.ForbiddenOnConstraintIndex beful dindex because the index is part of a constraint. If you want to drop the index, for instance, you must drop the constraint.  Neo.ClientError.Schema.IndexAlreadyExists Unable to perform operation because it would clash with a pre-existing index.  Neo.ClientError.Schema.IndexMultipleFound The request referenced an index by its schema, and multiple matching indexes were found.  Neo.ClientError.Schema.IndexNotApplicable The request did not contain the properties required by the index.  Neo.ClientError.Schema.IndexNotFound The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexWithNameAlreadyExists Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedLabelInSchema Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche are repeated reporty.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated relationship type.  Neo.ClientError.Schema.TokenNameError Atoken name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.Torbidden An attempt was made to perform an unauthorized action.  Neo.ClientError.Statement.AccessMode The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode The statement is attempting to perform operations using invalid arguments	${\tt Neo.ClientError.Schema.ConstraintWithNameAlreadyExists}$	Unable to perform operation because constraint with given name already exists.
specified index because the index is part of a constraint. If you want to drop the index, for instance, you must drop the constraint.  Neo.ClientError.Schema.IndexAlreadyExists  Unable to perform operation because it would clash with a pre-existing index.  Neo.ClientError.Schema.IndexNotApplicable  The request referenced an index by its schema, and multiple matching indexes were found.  Neo.ClientError.Schema.IndexNotApplicable  The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexNotFound  The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexNithNameAlreadyExists  Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche  The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche  Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche  Unable to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchema  Unable to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.TokenNameError  Atoken name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthorizationExpired  The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.CredentialsExpired  The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.Forbidden  An attempt was made to perform an unauthorized action.  Neo.ClientError.Security.Unauthorized  The cilent is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode  violation  The statement is attempting to perform operations using invalid arguments		Unable to perform operation because an equivalent schema rule already exists.
Neo.ClientError.Schema.IndexMultipleFound The request referenced an index by its schema, and multiple matching indexes were found.  Neo.ClientError.Schema.IndexNotApplicable The request did not contain the properties required by the index.  Neo.ClientError.Schema.IndexNotFound The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexWithNameAlreadyExists Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedLabelInSchema Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche Unable to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem Unable to create index or constraint because schema had a repeated relationship type.  Neo.ClientError.Schema.TokenNameError A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.CredentialsExpired The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.Unauthorized The credentials have expired and need to be updated.  Neo.ClientError.Security.Unauthorized The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode The request could not be completed due to access mode violation  Neo.ClientError.Statement.ArgumentError The statement is attempting to perform operations using invalid arguments	Neo. Client Error. Schema. Forbidden On Constraint Index	specified index because the index is part of a constraint. If you want to drop the index, for instance, you must drop
multiple matching indexes were found.  Neo.ClientError.Schema.IndexNotApplicable  The request did not contain the properties required by the index.  Neo.ClientError.Schema.IndexNotFound  The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexWithNameAlreadyExists  Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedLabelInSchema  Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche  Unable to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem  a Verage of the create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.TokenNameError  A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit  The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.AuthorizationExpired  The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.ToredentialsExpired  The credentials have expired and need to be updated.  Neo.ClientError.Security.Unauthorized  The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode  The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Schema.IndexAlreadyExists	Unable to perform operation because it would clash with a pre-existing index.
index.  Neo.ClientError.Schema.IndexNotFound  The request (directly or indirectly) referred to an index that does not exist.  Neo.ClientError.Schema.IndexWithNameAlreadyExists  Unable to perform operation because index with given name already exists.  Neo.ClientError.Schema.RepeatedLabelInSchema  Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche  Unable to create index or constraint because schema had a repeated property.  Unable to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem  Unable to create index or constraint because schema had a repeated relationship type.  Neo.ClientError.Schema.TokenNameError  A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit  The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.AuthorizationExpired  The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.CredentialsExpired  The credentials have expired and need to be updated.  Neo.ClientError.Security.Unauthorized  The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode  The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Schema.IndexMultipleFound	The request referenced an index by its schema, and multiple matching indexes were found.
Neo.ClientError.Schema.RepeatedLabelInSchema Neo.ClientError.Schema.RepeatedLabelInSchema Neo.ClientError.Schema.RepeatedLabelInSchema Neo.ClientError.Schema.RepeatedPropertyInCompositeSche ma Neo.ClientError.Schema.RepeatedRelationshipTypeInSchema Neo.ClientError.Schema.RepeatedRelationshipTypeInSchema Neo.ClientError.Schema.RepeatedRelationshipTypeInSchema Neo.ClientError.Schema.RepeatedRelationshipTypeInSchema Neo.ClientError.Schema.TokenNameError Neo.ClientError.Schema.TokenNameError Neo.ClientError.Schema.TokenNameError Neo.ClientError.Security.AuthenticationRateLimit The client has provided incorrect authentication details too many times in a row. Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect. Neo.ClientError.Security.CredentialsExpired The credentials have expired and need to be updated. Neo.ClientError.Security.Unauthorized The client is unauthorized due to authentication failure. Neo.ClientError.Security.Unauthorized The request could not be completed due to access mode violation Neo.ClientError.Statement.ArgumentError The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Schema.IndexNotApplicable	The request did not contain the properties required by the index.
name already exists.  Neo.ClientError.Schema.RepeatedLabelInSchema Unable to create index or constraint because schema had a repeated label.  Neo.ClientError.Schema.RepeatedPropertyInCompositeSche ma label to create index or constraint because schema had a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem unable to create index or constraint because schema had a repeated relationship type.  Neo.ClientError.Schema.TokenNameError and token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit too many times in a row.  Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.CredentialsExpired The credentials have expired and need to be updated.  Neo.ClientError.Security.Unauthorized The client is unauthorized due to authentication failure.  Neo.ClientError.Security.Unauthorized The request could not be completed due to access mode violation  Neo.ClientError.Statement.AccessMode The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Schema.IndexNotFound	The request (directly or indirectly) referred to an index that does not exist.
Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem a repeated property.  Neo.ClientError.Schema.TokenNameError	Neo.ClientError.Schema.IndexWithNameAlreadyExists	
a repeated property.  Neo.ClientError.Schema.RepeatedRelationshipTypeInSchem a repeated relationship type.  Neo.ClientError.Schema.TokenNameError A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.AuthorizationExpired The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.CredentialsExpired The credentials have expired and need to be updated.  Neo.ClientError.Security.Forbidden An attempt was made to perform an unauthorized action.  Neo.ClientError.Security.Unauthorized The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Schema.RepeatedLabelInSchema	
a repeated relationship type.  Neo.ClientError.Schema.TokenNameError  A token name, such as a label, relationship type or property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit  The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.AuthorizationExpired  The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.CredentialsExpired  The credentials have expired and need to be updated.  Neo.ClientError.Security.Forbidden  An attempt was made to perform an unauthorized action.  Neo.ClientError.Security.Unauthorized  The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode  The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments		
property key, used is not valid. Tokens cannot be empty strings and cannot be null.  Neo.ClientError.Security.AuthenticationRateLimit  The client has provided incorrect authentication details too many times in a row.  Neo.ClientError.Security.AuthorizationExpired  The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.CredentialsExpired  The credentials have expired and need to be updated.  Neo.ClientError.Security.Forbidden  An attempt was made to perform an unauthorized action.  Neo.ClientError.Security.Unauthorized  The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode  The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments		
too many times in a row.  Neo.ClientError.Security.AuthorizationExpired  The stored authorization info has expired. Please reconnect.  Neo.ClientError.Security.CredentialsExpired  The credentials have expired and need to be updated.  Neo.ClientError.Security.Forbidden  An attempt was made to perform an unauthorized action.  Neo.ClientError.Security.Unauthorized  The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode  The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Schema.TokenNameError	property key, used is not valid. Tokens cannot be empty
reconnect.  Neo.ClientError.Security.CredentialsExpired  The credentials have expired and need to be updated.  Neo.ClientError.Security.Forbidden  An attempt was made to perform an unauthorized action.  The client is unauthorized due to authentication failure.  Neo.ClientError.Statement.AccessMode  The request could not be completed due to access mode violation  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Security.AuthenticationRateLimit	The client has provided incorrect authentication details too many times in a row.
Neo.ClientError.Security.ForbiddenAn attempt was made to perform an unauthorized action.Neo.ClientError.Security.UnauthorizedThe client is unauthorized due to authentication failure.Neo.ClientError.Statement.AccessModeThe request could not be completed due to access mode violationNeo.ClientError.Statement.ArgumentErrorThe statement is attempting to perform operations using invalid arguments	Neo.ClientError.Security.AuthorizationExpired	
Neo.ClientError.Security.Unauthorized  The client is unauthorized due to authentication failure.  The request could not be completed due to access mode violation  Neo.ClientError.Statement.ArgumentError  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Security.CredentialsExpired	The credentials have expired and need to be updated.
Neo.ClientError.Statement.AccessMode  The request could not be completed due to access mode violation  Neo.ClientError.Statement.ArgumentError  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Security.Forbidden	An attempt was made to perform an unauthorized action.
Neo.ClientError.Statement.ArgumentError  The statement is attempting to perform operations using invalid arguments	Neo.ClientError.Security.Unauthorized	The client is unauthorized due to authentication failure.
invalid arguments	Neo.ClientError.Statement.AccessMode	
Neo.ClientError.Statement.ArithmeticError Invalid use of arithmetic, such as dividing by zero.	Neo.ClientError.Statement.ArgumentError	The statement is attempting to perform operations using invalid arguments
	Neo.ClientError.Statement.ArithmeticError	Invalid use of arithmetic, such as dividing by zero.

Status Code	Description
Neo.ClientError.Statement.ConstraintVerificationFailed	A constraint imposed by the statement is violated by the data in the database.
Neo.ClientError.Statement.EntityNotFound	The statement refers to a non-existent entity.
Neo.ClientError.Statement.ExternalResourceFailed	Access to an external resource failed
Neo.ClientError.Statement.NotSystemDatabaseError	This is an administration command and it should be executed against the system database.
Neo.ClientError.Statement.NotSystemDatabaseOnLeaderError	This is an administration command and it should be executed against the LEADER server of the system database.
Neo.ClientError.Statement.ParameterMissing	The statement refers to a parameter that was not provided in the request.
Neo.ClientError.Statement.PropertyNotFound	The statement refers to a non-existent property.
Neo.ClientError.Statement.RuntimeUnsupportedError	This query is not supported by the chosen runtime.
Neo.ClientError.Statement.SemanticError	The statement is syntactically valid, but expresses something that the database cannot do.
Neo.ClientError.Statement.SyntaxError	The statement contains invalid or unsupported syntax.
Neo.ClientError.Statement.TypeError	The statement is attempting to perform operations on values with types that are not supported by the operation.
Neo.Client Error.Transaction.Forbid den Due To Transaction Type	The transaction is of the wrong type to service the request. For instance, a transaction that has had schema modifications performed in it cannot be used to subsequently perform data operations, and vice versa.
Neo.ClientError.Transaction.InvalidBookmark	Supplied bookmark cannot be interpreted. You should only supply a bookmark that was previously generated by Neo4j. Maybe you have generated your own bookmark, or modified a bookmark since it was generated by Neo4j.
Neo.ClientError.Transaction.InvalidBookmarkMixture	Mixing bookmarks generated by different databases is forbidden. You should only chain bookmarks that are generated from the same database. You may however chain bookmarks generated from system database with bookmarks from another database.
${\tt Neo.ClientError.Transaction.TransactionAccessedConcurrently}$	There were concurrent requests accessing the same transaction, which is not allowed.
Neo.ClientError.Transaction.TransactionHookFailed	Transaction hook failure.
Neo.ClientError.Transaction.TransactionMarkedAsFailed	Transaction was marked as both successful and failed. Failure takes precedence and so this transaction was rolled back although it may have looked like it was going to be committed
Neo.ClientError.Transaction.TransactionNotFound	The request referred to a transaction that does not exist.
Neo.ClientError.Transaction.TransactionTimedOut	The transaction has not completed within the specified timeout (dbms.transaction.timeout). You may want to retry with a longer timeout.
$\label{thm:problem} Neo. Client {\tt Error.Transaction.TransactionValidationFailed} \\ d$	Transaction changes did not pass validation checks
Neo.ClientNotification.Procedure.ProcedureWarning	The query used a procedure that generated a warning.
Neo.ClientNotification.Statement.CartesianProductWarning	This query builds a cartesian product between disconnected patterns.
Neo.ClientNotification.Statement.DynamicPropertyWarning	Queries using dynamic properties will use neither index seeks nor index scans for those properties
Neo.ClientNotification.Statement.EagerOperatorWarning	The execution plan for this query contains the Eager operator, which forces all dependent data to be materialized in main memory before proceeding

Status Code	Description
Neo.ClientNotification.Statement.ExhaustiveShortestPat hWarning	Exhaustive shortest path has been planned for your query that means that shortest path graph algorithm might not be used to find the shortest path. Hence an exhaustive enumeration of all paths might be used in order to find the requested shortest path.
Neo.ClientNotification.Statement.ExperimentalFeature	This feature is experimental and should not be used in production systems.
${\tt Neo.ClientNotification.Statement.FeatureDeprecationWarning}$	This feature is deprecated and will be removed in future versions.
Neo.ClientNotification.Statement.JoinHintUnfulfillable Warning	The database was unable to plan a hinted join.
${\tt Neo.ClientNotification.Statement.NoApplicableIndexWarning}$	Adding a schema index may speed up this query.
${\tt Neo.ClientNotification.Statement.RuntimeUnsupportedWarning}$	This query is not supported by the chosen runtime.
Neo.ClientNotification.Statement.SuboptimalIndexForWildcardQuery	Index cannot execute wildcard query efficiently
Neo.ClientNotification.Statement.UnboundedVariableLeng thPatternWarning	The provided pattern is unbounded, consider adding an upper limit to the number of node hops.
Neo.ClientNotification.Statement.UnknownLabelWarning	The provided label is not in the database.
${\tt Neo.ClientNotification.Statement.UnknownPropertyKeyWarning}$	The provided property key is not in the database
Neo.ClientNotification.Statement.UnknownRelationshipTy peWarning	The provided relationship type is not in the database.
Neo.DatabaseError.Database.DatabaseLimitReached	The limit to number of databases has been reached.
Neo.DatabaseError.Database.UnableToStartDatabase	Unable to start database.
Neo.DatabaseError.Database.Unknown	Unknown database management error
Neo.DatabaseError.Fabric.RemoteExecutionFailed	The database was unable to execute a remote part of the statement.
Neo.DatabaseError.General.IndexCorruptionDetected	The request (directly or indirectly) referred to an index that is in a failed state. The index needs to be dropped and recreated manually.
Neo.DatabaseError.General.SchemaCorruptionDetected	A malformed schema rule was encountered. Please contact your support representative.
Neo.DatabaseError.General.StorageDamageDetected	Expected set of files not found on disk. Please restore from backup.
Neo.DatabaseError.General.UnknownError	An unknown error occurred.
Neo.DatabaseError.Schema.ConstraintCreationFailed	Creating a requested constraint failed.
Neo.DatabaseError.Schema.ConstraintDropFailed	The database failed to drop a requested constraint.
Neo.DatabaseError.Schema.IndexCreationFailed	Failed to create an index.
Neo.DatabaseError.Schema.IndexDropFailed	The database failed to drop a requested index.
Neo.DatabaseError.Schema.LabelAccessFailed	The request accessed a label that did not exist.
Neo.DatabaseError.Schema.PropertyKeyAccessFailed	The request accessed a property that does not exist.
${\tt Neo.Database Error.Schema.Relationship Type Access Failed}$	The request accessed a relationship type that does not exist.
Neo.DatabaseError.Schema.SchemaRuleAccessFailed	The request referred to a schema rule that does not exist.
Neo.DatabaseError.Schema.SchemaRuleDuplicateFound	The request referred to a schema rule that is defined multiple times.
Neo.DatabaseError.Schema.TokenLimitReached	The maximum number of tokens of this type has been reached, no more tokens of this type can be created.

Status Code	Description	
Neo.DatabaseError.Statement.CodeGenerationFailed	The database was unable to generate code for the query. A stacktrace can be found in the debug.log.	
Neo.DatabaseError.Statement.ExecutionFailed	The database was unable to execute the statement.	
Neo.DatabaseError.Statement.RemoteExecutionFailed	The database was unable to execute a remote part of the statement.	
${\tt Neo.DatabaseError.Transaction.TransactionCommitFailed}$	The database was unable to commit the transaction.	
Neo.DatabaseError.Transaction.TransactionLogError	The database was unable to write transaction to log.	
${\tt Neo.DatabaseError.Transaction.TransactionRollbackFaile} \ {\tt d}$	The database was unable to roll back the transaction.	
Neo.DatabaseError.Transaction.TransactionStartFailed	The database was unable to start the transaction.	
Neo.TransientError.Cluster.ReplicationFailure	Replication failure.	
Neo.TransientError.Cluster.Routing	Unable to route the request to the appropriate server	
Neo.TransientError.Database.DatabaseUnavailable	The database is not currently available to serve your request, refer to the database logs for more details. Retrying your request at a later time may succeed.	
Neo.TransientError.General.MemoryPoolOutOfMemoryError	The memory pool limit was exceeded. The corresponding setting can be found in the error message	
Neo.TransientError.General.OutOfMemoryError	There is not enough memory to perform the current task. Please try increasing 'dbms.memory.heap.max_size' in the neo4j configuration (normally in 'conf/neo4j.conf' or, if you are using Neo4j Desktop, found through the user interface) or if you are running an embedded installation increase the heap by using '-Xmx' command line flag, and then restart the database.	
Neo.TransientError.General.StackOverFlowError	There is not enough stack size to perform the current task. This is generally considered to be a database error, so please contact Neo4j support. You could try increasing the stack size: for example to set the stack size to 2M, add `dbms.jvm.additional=-Xss2M' to in the neo4j configuration (normally in 'conf/neo4j.conf' or, if you are using Neo4j Desktop, found through the user interface) or if you are running an embedded installation just add -Xss2M as command line flag.	
Neo.TransientError.General.TransactionMemoryLimit	There is not enough memory to perform the current task. Please try increasing 'dbms.memory.off_heap.max_size' in the neo4j configuration (normally in 'conf/neo4j.conf' or, if you are using Neo4j Desktop, found through the user interface), and then restart the database.	
Neo.TransientError.Request.NoThreadsAvailable	There are no available threads to serve this request at the moment. You can retry at a later time or consider increasing max thread pool size for bolt connector(s).	
Neo.TransientError.Security.AuthProviderFailed	An auth provider request failed.	
Neo.TransientError.Security.AuthProviderTimeout	An auth provider request timed out.	
Neo.TransientError.Security.ModifiedConcurrently	The user was modified concurrently to this request.	
Neo.TransientError.Transaction.BookmarkTimeout	Bookmark wait timed out. Database has not reached the specified version	
Neo.TransientError.Transaction.ConstraintsChanged	Database constraints changed since the start of this transaction	
Neo.TransientError.Transaction.DeadlockDetected	This transaction, and at least one more transaction, has acquired locks in a way that it will wait indefinitely, and the database has aborted it. Retrying this transaction will most likely be successful.	
Neo.TransientError.Transaction.Interrupted	Interrupted while waiting.	
Neo.TransientError.Transaction.LeaseExpired	The lease under which this transaction was started is no longer valid.	

Status Code	Description
${\tt Neo.TransientError.Transaction.LockAcquisitionTimeout}$	Unable to acquire lock within configured timeout (dbms.lock.acquisition.timeout).
Neo.TransientError.Transaction.LockClientStopped	The transaction has been terminated, so no more locks can be acquired. This can occur because the transaction ran longer than the configured transaction timeout, or because a human operator manually terminated the transaction, or because the database is shutting down.
$\label{lem:neo.TransientError.Transaction.MaximumTransactionLimit} Reached$	Unable to start new transaction since the maximum number of concurrently executing transactions is reached (dbms.transaction.concurrent.maximum). You can retry at a later time or consider increasing allowed maximum of concurrent transactions.
Neo.TransientError.Transaction.Outdated	Transaction has seen state which has been invalidated by applied updates while transaction was active. Transaction may succeed if retried.
Neo.TransientError.Transaction.Terminated	Explicitly terminated by the user.
